PROFESSIONAL SUMMARY

Dynamic React JS Developer with 3+ years of experience in building high-performance web apps using React, JavaScript, and modern front-end technologies. Expertise in creating user-friendly interfaces, integrating APIs, managing state with Redux, and utilizing React Flow. Proven track record in collaborating with cross-functional teams to deliver scalable, responsive solutions while maintaining best practices in coding and UI/UX design.

SKILLS

Frontend: ReactJS, NextJs, Redux/Redux Toolkit, JavaScript, TypeScript, HTML5

Design & Styling: Material UI, Tailwind CSS, Bootstrap, CSS

Backend: Node.js, Express.js, API Integration, MongoDB

Version Control: Git, SVN

AI & Productivity: Prompt Engineering, AI-assisted workflow optimization

EXPERIENCE

Software Engineer

Altruist Technology Pvt Ltd, Panchkula, HR

Oct 2024 – Present

- **Secova (Document Verification System)** – Built a secure document verification platform for UK clients using **Next.js** and **TypeScript**. Implemented multi-role access (DMS, Member, HR, QA) with full encryption/decryption. Developed a highly dynamic dashboard driven by backend arrays, minimizing UI logic and maximizing performance. Added multilingual support (**EN, FR, ES**) and multi-format document previews (e.g., TIFF) through efficient data handling and secure server APIs.
- **Tawseel GEO (Biker Tracking System)** – Developed a tracking module using **Google Maps APIs** to visualize real-time biker locations. Designed an intuitive UI with MUI components and integrated infinite pagination for smooth data handling. Actively used across Dubai and Sharjah for live biker monitoring.

Software Developer

Altruist Technology Pvt Ltd, Panchkula, HR

Jul 2022 – Oct 2024

- **Fire Bird (Omnichannel Solution to Run Campaigns)** – Developed a dynamic sidebar for managing user roles and permissions. Implemented sender IDs and templates for WhatsApp, email, SMS, and web channels. Integrated Chatbot Flow using WhatsApp **React Flow**, handling nested arrays and API data for dynamic interactions. Optimized the UI with reusable components, enhancing performance and user experience.
- **PNL Dependo Logistics** – Led frontend development for a delivery management app, creating a dynamic dashboard with interactive data visualizations using React **Chart.js**. Implemented two-factor authentication to enhance security. Optimized UI elements, resulting in a 15% increase in user engagement and satisfaction.
- **Group Hospi Cash (Insurance App)** – Developed a form-based insurance application with robust validations using Material-UI components and tables. Added a payout section and integrated the Group Hospi Cash feature, ensuring a seamless user experience.
- **Utility Bills** – Managed complex state efficiently using Redux Toolkit for seamless data handling. Streamlined payment processes, enabling users to manage bill payments and financial transactions effortlessly.

Intern

Altruist Technology Pvt Ltd, Panchkula, HR

Jan 2022 – Jul 2022

- Gained exposure to React, Redux, HTML, CSS, Bootstrap, and Java.
- Assisted in projects and contributed to SQL query development for reporting purposes.
- Monitored networks and addressed technical issues as part of internship responsibilities.
- Developed a React store app using React.js with dynamic data.

EDUCATION

Kurukshetra University

Apr 2018 – Apr 2022

B.Tech, GPA: 8.0
